INTRODUCTION

1. One of the tasks assigned to the FAO Documentation Center is to make readily available to FAO staff, particularly field personnel, to FAO Member Governments, to UN and UN Agencies, to other interested international and national bodies, and to individuals concerned, the technical, economic and social information contained in FAO publications and documents.

2. To this effect, the Documentation Center has undertaken -- retroactively for the period 1945-1966 as well as on a current basis -- to select, analyze and index FAO publications and documents in the technical, economic and social fields covered by FAO.

3. As regards publications and documents produced currently, a subject index with the corresponding bibliographical data is issued regularly since January 1967 in a Monthly Bulletin entitled FAO Documentation - Current Index.

4. The gathering, selection, analysis and indexing of the publications and documents produced from 1945 to 1966 is now in process. These operations are taking place successively in the broad fields assigned to the FAO technical and economic divisions. An Index of FAO Technical Assistance Reports, 1951-1965, covering all divisional fields, has already been published in September 1966 - Doc. PU: DC/Sp.1.

5. The present index -- the first of a series of "divisional" and "departmental" indexes -- covers publications and documents produced since 1945 by the Division (now Department) of Fisheries, and by regional fisheries councils. It contains some 2,600 entries in the bibliographical list, from which the subject-matter index and the author index have been derived.

6. In order to increase the number of entries, within the time and staff resources available, we have postponed to a later issuance the indexing of a number of technical papers (grouped in volumes) when their title was sufficiently indicative of their contents. In such cases, a detailed indexing has been done only for the volumes (and their main sections), which can thus be retrieved through consultation of the subject index. In the bibliographical list, the volumes and the documents contained therein are listed successively and suitably cross-referenced.

7. Throughout the preparation of this Index, the Department of Fisheries has wholeheartedly provided most substantial assistance to the Documentation Center, firstly by making arrangements for the inventory, collection and selection of the material to be indexed, secondly by participating actively in the bibliographical, analysis, indexing and processing operations.

8. This Index constitutes the first large scale usage test of the vocabulary of *descriptor*s (i.e. standardized indexing terms) developed by the Documentation Center. Such vocabularies only reach their optimum extent and content after several years, as experience is gained through indexing problems and practice. The present Index therefore contains also a certain number of /keywords/, i.e. terms encountered during the indexing operations and considered for later inclusion in the vocabulary after a review of their frequency and suitability.

9. The Documentation Center will be grateful for any observations and suggestions aimed at improving the quality of this and similar indexes.

EXPLANATORY NOTES

The Index consists of three parts: an analytical index, an index by authors and a bibliographical list.

The Index has been produced automatically by means of special computer programs. This method of production entails a number of peculiarities and conventions in layout which are explained below in order to facilitate consultation.

DOCUMENTARY UNIT

The "documentary unit" constitutes the basic unit of entry into the documentation system. It corresponds, according to the importance of the document to be indexed, either to the document itself (publication, report, monograph, etc.) or to part of the document (article of periodical, volume or section of a publication, technical paper in a meeting report, etc.).

REFERENCE NUMBER

Each documentary unit is identified by an alphanumerical reference composed of three groups of symbols: (a) accession number in the documentation system (from 50001 onwards for the documents of the period 1945-1966), (b) year of publication (last two digits), (c) document class symbol (see list of abbreviations).

The bibliographical list shows the documentary units in order of accession numbers. Each index gives the reference number for each entry, thus permitting immediate reference to the bibliographical list for complete details. Within the bibliographical list, cross references are given between documentary units, when required, by means of their respective accession numbers.

BIBLIOGRAPHICAL LIST

1. Each bibliographical entry, corresponding to one documentary unit, contains the following data:

   (a) Identification

   (b) Author(s)

   (c) Title

   (d) Source, date, pages, etc.

   (e) Title in original language and/or in other official languages

   (f) Indexing synopsis.

2. The following explanations will facilitate the consultation of this list:

   (a) Identification

   - Reference number (Accession No., Year, Class Symbol)

   - Country, region, or oceanographic area concerned (5 letters; see list of abbreviations)

- Job No. (5 digits)

- Languages: Original language/language(s) in which the document is available (see list of abbreviations)

- Reference symbol: Originating division symbol, and other identifying symbols of the document proper, when existing.

- Special indications, e.g. NOT REL. (not released for general distribution).

(b) Authors

- Names of individual author(s) of the document, or of editors (ED) or of compilers (COMP) of corporate author (FAO Division, Organization, etc.)

(c) Title

- Title of the documentary unit, in English, possibly completed by subtitles or indication of volumes or parts.

- When quoted, the names of countries are those in use at the time the document was prepared and/or issued and appearing on the cover and/or title page. (For cross references, see list of abbreviations.)

(d) Source, etc.

- The year indicated is the year of publication of the document, or of the last document when several are grouped in one documentary unit.

- The number of pages includes all pages (from cover to cover, in the case of publications, reports, etc.) in order to facilitate the calculation of the charge when requesting photographic reproduction.

- For the indications of graphs, photographs, tables, annexes, etc., see list of abbreviations.

- When a document has been split into various documentary units (D.U.'s), the document as a whole constitutes one D.U. and there are, in addition as many "secondary" D.U.'s as required for its parts. In this case, cross references are indicated as follows:

  (a) in the main D.U.:

  FOR.DET.INDEX SEE /...../ TO /...../

  FOR.DET.BIBLIOGR. SEE /...../ TO /...../

  (b) in the secondary D.U.'s:

  CF /...../

  The main D.U. and its secondary D.U.'s follow each other in the bibliographical list.

(e) Languages

ORIGINAL TITLE (TITRE ORIGINAL, TITULO ORIGINAL) gives the title in the original language.

TITRE FRANCAIS (TITULO ESPANOL) gives the title in French or Spanish, when copies exist in these languages or when the document is bi - or tri-lingual.

(f) Indexing synopsis

The synopsis gives an idea of the form and subject matter contents of the documentary unit in one or several sentences. Each sentence contains *descriptor*s or /keyword/s linked, as required, by other words.

The *descriptor*s are chosen by the indexers in a vocabulary of standard indexing terms. The /keyword/s are supplementary terms freely chosen by the indexers and suggested for possible inclusion in the vocabulary, after review of their frequency of use and/or suitability.

Both *descriptor*s and /keyword/s are written, between their respective symbols, in the singular, but suffixes are added, where required, to give the plural form or other derived forms. In a few cases, this mode of writing produces irregular English spelling, for instance *COUNTRY*S, *HYDROLOGY*CAL. It has however the advantage of bringing together, in the analytical index, the various forms of a same term.

INDEX BY AUTHORS

This index lists all individual authors alphabetically together with the reference number of the documents prepared, edited or compiled by them. In a very few cases, space limitations have made it necessary to abbreviate names or to write hyphenated names as one name.

ANALYTICAL INDEX

1. This part provides a detailed subject of the contents of each documentary unit, as described by the sentences of the indexing synopsis.

2. Entries have been made to all *descriptor*s and /keyword/s contained in the indexing synopsis, except for a few form *descriptor*s such as *WORKING PAPER* *PROJECT REPORT* and the like, which are used only in searches made by direct access to the computer memory, and would unnecessarily lengthen the printed index.

3. The terms serving as entries appear immediately to the right of the double blank column running vertically towards the middle of the page. Each entry appears "in context" i.e. preceded and followed by the other words or terms in the original sentence of the indexing synopsis. This enables the user of the index to select, among the various entries for the same *descriptor* or /keyword/, those which best answer his query, as indicated by the context words, including the indication of country or region concerned, which appears in a column at the right. Each entry line also shows the reference number of the related documentary unit, to which the user may refer in the bibliographical list.

4. When a *descriptor* or /keyword/ is composed of several words, cross reference entries to the second (third, etc.) word, have been added to the analytical index. Such entries stand isolated, without context. The reader should refer to the first word in the alphabetical sequence, to find the complete references.

5. It will be observed that, for most entries, only part of the original indexing sentence appears, with words sometimes truncated at the beginning or end of a line. This is due to the limitation of the length of the printed line. Furthermore whenever a *descriptor* or /keyword/ serving as entry is situated near the beginning of the original indexing sentence, the part of the line printed at its left is the end of the indexing sentence (indicated by the symbol .=). This is in order to include the maximum amount of information on each line.

HOW TO OBTAIN THE DOCUMENTS INDEXED

1. Publications and documents are divided into three main classes (P - Publications, M - Main documents, W - Working Papers), each class subdivided into sub-classes (see list of abbreviations). The class symbol is shown immediately after the accession number and year of publication, in the bibliographical list.

2. Requests for specific Publications (symbols PP, PS, PM or PI) and Main Documents (symbols MO, MR, MI) should be addressed to the Distribution and Sales Section, Publications Division. Apart from documents shown as NOT REL. (not released) they are available from stock, at listed prices or against a handling charge.

3. Requests for specific Working Papers (symbols WM, WS, WI) should be addressed to the Documentation Center (some of these papers may be subject to distribution limitations). Since no stocks are normally kept, requests will be met by reproductions in the form of microfilms or photocopies (see rates below). The requests should specify the type of reproduction preferred. Requests for Publications or Main Documents no longer in stock will also be met as above.

4. In order to facilitate processing, all requests should quote, beside the author and title, the ACCESSION NUMBER (Thus: Acc. No. 12345).

REQUESTS FOR DOCUMENTARY INFORMATION

5. Requests for documentary information on specific TOPICS should be addressed to the Documentation Center. The requests should:

(a) be as precise as possible (e.g. quote regions or countries, specific animals, plants, diseases or products)

(b) indicate if only bibliographical data are required or also the documents themselves.

(c) if documents are requested, the type of reproduction preferred.

INTRODUCTION

1. Le Centre de documentation de la FAO a notamment pour tâche de fournir au personnel de la FAO -en particulier aux experts sur le terrain- aux Etats Membres, à l'Organisation des Nations Unies et à ses institutions, aux organismes nationaux et internationaux et aux personnes intéressées les informations d'ordre technique, économique et social que contiennent les publications et documents de la FAO.

2. A cet effet, le Centre de documentation a entrepris, rétroactivement pour la période 1945-1966 et de façon courante depuis cette époque, de choisir, analyser et indexer les publications et documents de la FAO portant sur les domaines techniques, économiques et sociaux dont elle s'occupe.

3. En ce qui concerne les publications et documents récents, un index par matières, contenant les données bibliographiques correspondantes, paraît régulièrement depuis janvier 1967 dans un bulletin mensuel intitulé Documentation de la FAO - Index courant.

4. La collecte, le choix, l'analyse et l'indexage des publications et documents publiés de 1945 à 1966 sont actuellement en cours. Ces opérations se feront successivement dans chacun des grands domaines qui sont du ressort des divisions techniques et économiques de la FAO. Un Index des rapports d'assistance technique de la FAO - 1951-1965, qui s'étend à l'ensemble des domaines des divisions, a déjà paru en septembre 1966 sous la cote PU: DC/Sp. 1.

5. Le présent Index, qui est le premier d'une série d'index par divisions ou départements, se rapporte aux publications et documents produits depuis 1945 par l'ancienne Division des pêches (actuellement Département des pêches) y compris les conseils régionaux des pêches. La liste bibliographique comprend environ 2600 titres qui sont traités dans un index par matières et un index par auteurs.

6. Afin de donner le maximum d'information possible, compte tenu du temps et des ressources en personnel dont on disposait, on a reservé pour une publication ultérieure l'indexage d'un certain nombre de documents techniques (réunis en volumes) lorsque leur titre était suffisamment explicite. En pareil cas, l'indexage n'a été fait en détail que pour les volumes (et leurs parties principales) qu'il est donc possible de retrouver par l'intermédiaire de l'index par sujets. Dans la bibliographie les volumes et les documents qu'ils contiennent sont répertoriés à la suite avec renvois réciproques.

7. Tout au long de la préparation du présent Index, le Département des pêches nous a apporté sans réserve un concours très important, non seulement en procédant à l'inventaire, à la collecte et au choix des documents à indexer, mais aussi en participant activement aux opérations d'analyse, d'indexage et de mise au point.

8. Le présent Index a permis de mettre à l'essai pour la première fois, avec un fonds documentaire de quelque envergure, le vocabulaire de *descripteur*s dressé par le Centre de documentation. Ces vocabulaires qui sont composés de termes normalisés choisis en vue des travaux d'indexage, ne parviennent à leur étendue et à leur contenu définitifs qu'après plusieurs années. Leur mise au point exige la solution des multiples problèmes d'indexage rencontrés dans la pratique. On a également utilisé un certain nombre de /mots-clé/s, c'est-à-dire de termes rencontrés au cours des opérations d'indexage et retenus en vue de leur adoption ultérieure dans le vocabulaire après examen de leur fréquence et de leur utilité.

9. Le Centre de documentation accueillera avec intérêt toutes observations et suggestions qui pourraient contribuer à perfectionner les index qui suivront ce premier travail.

NOTES EXPLICATIVES

Cet Index comprend trois parties: index analytique, index par auteurs et liste bibliographique.

L'index est produit automatiquement au moyen de programmes spéciaux d'ordinateurs. Cette méthode entraîne certaines particularités et conventions de présentation qui sont expliquées ci-après afin de faciliter la consultation.

UNITE DOCUMENTAIRE

L'unité documentaire constitue l'unité de base pour l'entrée dans le système de documentation. Selon l'importance du document à indexer, l'unité documentaire peut être soit le document complet (publication, rapport, monographie, etc.) soit une partie d'un document (article de périodique, volume ou partie d'une publication, note technique dans un rapport de réunion, etc.).

NUMERO DE REFERENCE

Chaque unité documentaire est affectée d'une référence composée de lettres et de chiffres en trois groupes: a) numéro d'entrée dans le système documentaire, ou "numéro d'accession" (à partir de 50 001 pour les documents de la période 1945-1966); b) année de publication (deux derniers chiffres du millésime); c) classe du document (voir liste des abréviations).

La liste bibliographique donne les unités documentaires dans l'ordre de leurs numéros d'accession. Dans les deux autres index, le numéro de référence figure à chacune des rubriques, ce qui permet de se reporter immédiatement à la liste bibliographique pour plus ample information. A l'intérieur de la liste bibliographique, figurent au besoin des renvois réciproques entre unités documentaires au moyen de leurs numéros d'accession respectifs.

LISTE BIBLIOGRAPHIQUE

1. Chaque indication bibliographique, correspondant à une unité documentaire, contient les éléments suivants:

   a) identification

   b) auteur ou auteurs

   c) titre

   d) source, date, nombre de pages, etc.

   e) titre dans la langue originale ou dans les autres langues officielles

   f) résumé analytique.

2. Les indications ci-dessous faciliteront la consultation de cette liste:

   a) Identification

   - numéro de référence (numéro d'accession, année, classe du document)

   - pays, région ou zone océanographique intéressée (5 lettres: cf. liste des abréviations)

   - numéro d'impression (5 chiffres)

- langues: langue ou langues originales du document (cf. liste des abréviations)

- référence: initiales de la division dont le document est issu; éventuellement, indications permettant d'identifier le document

- indications spéciales: par exemple NOT. REL. (c'est-à-dire que le document ne peut être diffusé).

b) Auteurs

- Nom de l'auteur ou des auteurs du document, ou de son éditeur (ED) ou de la personne qui en a réuni les éléments (COMP) ou de l'auteur collectif (division de la FAO, organisme, etc.)

c) Titre

- Titre de l'unité documentaire, en anglais, éventuellement complété au moyen de sous-titres ou de l'indication des volumes ou des différentes parties.

- Les noms de pays sont ceux qui étaient en usage au moment où le document a été rédigé ou imprimé, tels qu'ils figurent sur la couverture ou la page de titre. (Pour les renvois, se reporter à la liste des abréviations.)

d) Source, etc.

- L'année indiquée est l'année de parution du document, ou du dernier en date des documents.

- L'indication du nombre de pages permet de calculer la redevance en cas de demande de reproduction photographique.

- Les illustrations, graphiques, tableaux, annexes, etc. sont indiqués au moyen d'abréviations: se reporter à la liste des abréviations.

- Lorsqu'un document a été fractionné en plusieurs unités documentaires (U. D.), le document complet constitue une U. D. principale, à laquelle s'ajoutent autant d'U. D. secondaires qu'il contient de parties différentes. Les renvois sont alors indiqués comme suit:

  a) dans l'U. D, principale:

  FOR. DET. INDEX SEE /...../ TO /...../
  (pour l'indexage détaillé, cf. /..... à /...../)

  FOR. DET. BIBLIOGR. SEE /...../ TO /...../
  (pour la bibliographie détaillée, cf. /..... à /...../)

  b) dans les U. D. secondaires:

  CF /...../

L'U. D. principale et les U. D. secondaires correspondantes se suivent dans la liste bibliographique.

e) Langues

L'indication ORIGINAL TITLE (TITRE ORIGINAL, TÍTULO ORIGINAL) précède le titre dans la langue originale.

L'indication TITRE FRANCAIS (TÍTULO ESPAÑOL) précède le titre en français ou en espagnol, lorsque le document existe dans ces langues, ou s'il est bilingue ou trilingue.

f) Résumés analytiques

Le résumé donne, en une ou plusieurs phrases, une idée de la forme, du sujet et du contenu de l'U.D.. Chaque phrase contient des *descripteurs*s ou des /mots-clé/s reliés par d'autres mots.

- Les *descripteurs*s sont choisis par les indexeurs dans un vocabulaire comprenant des termes normalisés. Les /mots-clé/s au contraire sont des termes complémentaires librement choisis par les indexeurs. Les /mots-clé/s pourront être incorporés ultérieurement au vocabulaire, après étude de leur fréquence et de leur utilité.

  Aussi bien les *descripteurs* que les /mots-clé/s sont orthographiés au singulier, entre les signes qui en marquent le début et la fin, mais des suffixes peuvent s'y ajouter afin de marquer le pluriel ou des formes dérivées. Cette graphie aboutit parfois à une orthographe anglaise irrégulière telle que *COUNTRY*S, *HYDROLOGY*CAL. Ceci a cependant l'avantage de rassembler les diverses formes d'un même terme au même endroit dans l'index analytique.

INDEX PAR AUTEURS

Cet index énumère tous les auteurs individuels par ordre alphabétique et donne pour chacun le numéro de référence des documents qu'ils ont rédigés ou dressés. Il arrive que le manque de place ait amené à abréger les noms ou à écrire les noms composés sans trait d'union.

INDEX ANALYTIQUE

1. Cet index donne en détail le contenu de chaque unité documentaire, tel qu'il a été décrit dans les résumés analytiques.

2. Il renvoie à tous les *descripteurs*s et/mots-clé/s contenus dans le résumé analytique, à l'exception de quelques *descripteur*s (tels que *WORKING PAPER*, *PROJECT REPORT*) qui servent exclusivement aux recherches directes dans la mémoire de l'ordinateur et qui allongeraient inutilement l'index présenté dans ce volume.

3. Les termes qui servent de rubriques figurent immédiatement à droite de la colonne blanche qui partage chaque page par le milieu. Chaque rubrique est donnée "dans son contexte", c'est-à-dire qu'elle est présentée et suivie par le restant de la phrase extraite du résumé analytique. Ceci permet au lecteur de choisir, parmi les différentes rubriques données pour un même *descripteur* ou un même /mot-clé/, celles qui correspondent le mieux à ce qu'il cherche, en fonction des mots du contexte et à l'aide de l'indication du pays ou de la région intéressée donnée dans la colonne de droite. Chaque ligne de cet index donne également le numéro de référence de l'unité documentaire en question, à laquelle le lecteur pourra se reporter dans la liste bibliographique.

4. Lorsqu'un *descripteur* ou un /mot-clé/ comprend plusieurs mots, l'index analytique renvoie à chacun de ces mots. Ces rubriques sont isolées, sans contexte. Le lecteur se reportera au premier mot dans l'ordre alphabétique, où il trouvera des renvois complets.

5. On notera que, pour la plupart des rubriques, la phrase extraite du résumé analytique est incomplète. Les mots sont parfois tronqués au début ou à la fin d'une ligne. Cette présentation est due à la longueur fixe de la ligne d'imprimante. Par ailleurs, lorsqu'un *descripteur* ou un /mot-clé/ utilisé comme rubrique se trouve près du début de la phrase tirée du résumé analytique, la partie de ligne imprimée à gauche est en réalité la fin de la phrase. La fin de la phrase est indiquée par le signe. ▪ Cette présentation permet de donner le maximum d'information par ligne.

COMMANDES DE DOCUMENTS INDEXES

1. Les publications et documents sont divisés en trois grandes classes (P = Publications, M = documents principaux, W = notes de travail), chacune de ces classes étant subdivisée en sous-classes (cf. liste des abréviations). La classe est indiquée immédiatement après le numéro d'accession et l'année de parution, dans la liste bibliographique.

2. Les demandes de publications (PP, PS, PM ou PI) et de documents principaux (MO, MR, MI) doivent être adressées à la Section distribution et vente de la Division des publications. A l'exception des documents qui ne peuvent être diffusés (NOT REL.) ils seront fournis contre paiement du prix du catalogue ou remboursement des frais de service et d'expédition.

3. Les demandes de notes de travail (WM, WS, WI) doivent être adressées au Centre de documentation, mais certaines de ces notes peuvent être assujetties à des conditions spéciales qui en restreignent la distribution. Les notes de travail n'étant pas normalement conservées en stock, le Centre fournira des reproductions sous forme de microfilms ou de photocopies (voir tarif ci-dessous). On est prié de spécifier dans la demande le genre de reproduction préféré. Au cas où une publication ou un document principal est épuisé, la demande sera satisfaite de la même façon.

4. Afin de faciliter l'exécution des commandes, prière de préciser, outre l'auteur et le titre, le NUMERO D'ACCESSION (par exemple: Acc. No. 12345).

DEMANDE D'INFORMATIONS DOCUMENTAIRES

Les demandes d'informations documentaires sur des sujets précis doivent être adressées au Centre de documentation. Ces demandes doivent:

a) être aussi précises que possible (par exemple: indiquer les régions ou les pays, les espèces animales ou végétales, les maladies ou les produits dont il s'agit);

b) indiquer si l'on désire uniquement des données bibliographiques ou si l'on demande également les documents eux-mêmes;

c) indiquer le type de reproduction préféré, si l'on désire recevoir des documents.

TARIF DE REPRODUCTION (TARIF "BIBLIOTHEQUE" REVISE)

Applicable à la reproduction de livres, articles de périodiques, documents

MICROFILM (35 mm, sans perforation, une ou deux pages par cliché)	
négatif par 10 clichés ou moins	0,50 dollar E.-U.
positif par 20 clichés ou moins	1,25 dollar E.-U.
AGRANDISSEMENTS (22 x 28 cm) de microfilm 35 mm, chacun (non compris le coût du microfilm)	0,35 dollar E.-U.
PHOTOSTAT (29 x 39 cm), une ou deux pages par image	
négatif	0,50 dollar E.-U.
positif	1,00 dollar E.-U.
COPIE ELECTROSTATIQUE (22 x 28 cm) positif, par page	0,20 dollar E.-U.

FRAIS D'EXPEDITION DES DOCUMENTS PRINCIPAUX (Classe "M")

(Le service des documents est assuré gratuitement aux Etats Membres de la FAO)

1-100 pages: $1,00 ou FF 3,50; 101-150 pages: $1,50 ou FF 5,25; plus de 150 pages: $2,00 ou FF 7,00

LE REGLEMENT DOIT SE FAIRE DANS UNE MONNAIE ACCEPTEE PAR LA FAO.

INTRODUCCION

1. Una de las tareas asignadas al Centro de Documentación de la FAO es facilitar al personal de ésta, sobre todo al destacado en los países, y a los Estados Miembros de la Organización, a las Naciones Unidas y a sus organismos especializados, así como a otras organizaciones internacionales y nacionales y a particulares interesados, el acceso a la información técnica, económica y social que contienen las publicaciones y documentos de la Organización.

2. A tal efecto, el Centro de Documentación ha acometido la tarea -con carácter retroactivo para el período 1945-1966, como asimismo en lo que respecta al material actual- de proceder a una selección, análisis y puesta en índice de las publicaciones y documentos de la FAO sobre las materias técnicas, económicas y sociales de que la Organización se ocupa.

3. Por lo que se refiere a las publicaciones y documentos que se producen en la actualidad, a partir de enero de 1967 se publica periódicamente un índice por materias, con los correspondientes datos bibliográficos, en un boletín mensual titulado Documentación de la FAO - Indice corriente.

4. Por otra parte, está en curso de realización el acopio, selección, análisis y puesta en índice de las publicaciones y documentos producidos de 1945 a 1966, trabajos que se llevan a cabo sucesivamente con respecto a los grandes temas encomendados a las Direcciones técnicas y económicas de la FAO. En septiembre de 1966 se publicó un Indice de informes de asistencia técnica de la FAO, 1951-1965, que comprendía todos los sectores de las Direcciones (Doc. PU: DC/Sp. 1).

5. El presente índice -primero de una serie estructurada por Direcciones y Departamentos- comprende las publicaciones y documentos producidos desde 1945 por la Dirección (hoy Departamento) de Pesca y por los Consejos Regionales de Pesca. Contiene unas 2.600 voces en la lista bibliográfica, habiendo servido de base para el índice de materias y el de autores.

6. Con el fin de ofrecer la mayor cantidad posible de información, teniendo en cuenta el tiempo y el personal de que se disponía, se ha aplazado para una edición posterior la puesta en índice de algunos documentos técnicos (reunidos en volúmenes) cuando su título era suficientemente expresivo de su contenido. En tales casos, se ha hecho la puesta en índice de los volúmenes (y sus secciones principales) y de este modo pueden ser localizados consultando el índice de materias. En la lista bibliográfica, los volúmenes y los documentos que contienen figuran por orden sucesivo con las oportunas referencias cruzadas.

7. En toda la preparación del presente Indice, el Departamento de Pesca ha prestado una ayuda extraordinariamente considerable al Centro de Documentación, no sólo adoptando las oportunas disposiciones para el inventario, acopio y selección del material que había de ponerse en índice, sino también participando activamente en los trabajos bibliográficos, de análisis, puesta en índice y elaboración.

8. Este Indice constituye el primer ensayo en gran escala de empleo del vocabulario de "descriptores" (es decir, términos fijos normalizados) elaborado por el Centro de Documentación. Tales vocabularios sólo alcanzan su extensión y contenido óptimos transcurridos varios años, a medida que se va adquiriendo experiencia en la resolución de los problemas de orden práctico que se plantean. Por tanto, el presente Indice contiene también un cierto número de palabras clave, es decir, términos que se han destacado durante los trabajos de puesta en índice y que se han tenido en cuenta para su ulterior inclusión en el vocabulario, una vez analizadas su frecuencia e idoneidad.

9. El Centro de Documentación agradecerá cualquier observación o sugerencia encaminada a mejorar la calidad de este Indice y otros análogos.

NOTAS EXPLICATIVAS

El Indice consta de tres partes: un índice analítico, un índice de autores y una lista bibliográfica.

El Indice ha sido preparado automáticamente mediante programas especiales con calculadoras. Este método lleva consigo algunas particularidades y convenciones en punto a disposición que se exponen a continuación con objeto de facilitar la consulta.

UNIDAD DOCUMENTAL

La "unidad documental" constituye la unidad básica de asiento en el sistema de documentación. Corresponde, según la importancia del documento que se ha de repertoriar, al documento mismo (publicación, informe, monografía, etc.) o a parte del documento (artículo de revista, volumen o sección de una publicación, documento técnico que figure en el informe de una reunión, etc.).

NUMERO DE REFERENCIA

Toda unidad documental se identifica mediante una referencia alfabético-numérica compuesta por tres grupos de símbolos: (a) número de entrada en el sistema de documentación (desde 50001 en adelante para los documentos del período 1945-1966), (b) año de publicación (últimos dos dígitos), (c) símbolo clasificador del documento (véase la Lista de abreviaturas).

En la lista bibliográfica se consignan las unidades documentales por orden de números de entrada. En cada índice figura el número de referencia de cada asiento, permitiendo así consultar inmediatamente la lista bibliográfica para obtener detalles completos. De ser necesario, en la lista bibliográfica se hacen reenvíos recíprocos (remisiones) entre las unidades documentales mediante sus respectivos números de entrada.

LISTA BIBLIOGRAFICA

1. Cada asiento bibliográfico que corresponde a una unidad documental contiene los datos siguientes:

   a) Identificación

   b) Autor(es)

   c) Título

   d) Fuente, fecha, páginas, etc.

   e) Título en el idioma original o en otros idiomas oficiales, o en ambos

   f) Sinopsis.

2. Las explicaciones siguientes facilitarán la consulta de la lista bibliográfica:

   a) Identificación

      - Número de referencia (número de entrada, año, símbolo clasificador

- País, región o zona oceanográfica de que se trate (5 letras; véase la Lista de abreviaturas).

- Número del trabajo (5 dígitos).

- Idiomas: idioma o idiomas originales en que existe el documento (véase la Lista de abreviaturas).

- Símbolo de referencia: símbolo de la Dirección que lo ha producido y otros símbolos de identificación del documento propiamente dicho, cuando existan.

- Indicaciones especiales, por ejemplo, NOT REL. (no autorizada su distribución general).

b) Autores

- Nombre(s) del autor o autores del documento, de los editores redactores (ED) o de los compiladores (COMP) o de los autores corporativos (Dirección de la FAO, organización, etc.).

c) Título

- Título de la unidad documental, en inglés, de ser posible completado con subtítulos o indicaciones de los volúmenes o partes de que consta.

- Cuando se citen, los nombres de los países son los usuales en la fecha en que se preparó o se publicó el documento y los que aparecen en la cubierta o en la portada del mismo (Para los reenvíos, véase la Lista de abreviaturas).

d) Fuente, etc.

- El año indicado es el de publicación del documento, o bien del último documento cuando se agrupan varios de éstos en una unidad documental.

- El número de páginas comprende todas las páginas (de cubierta a contracubierta, tratándose de publicaciones, informes, etc.) a fin de facilitar el cálculo del importe de la reproducción fotográfica.

- Para las indicaciones de gráficas, fotografías, cuadros, anexos, etc., véase la Lista de abreviaturas.

- Cuando un documento se ha dividido en varias unidades documentales (UD), el documento en conjunto constituye una UD existiendo tantas UD "secundarias" como partes tenga. En este caso, las remisiones se indican del modo siguiente:

  a) en la UD principal:

     PARA INDICE DET. VEASE/ ...../A / ..... /

     PARA BIBLIOGRAF. DET. VEASE / ..... / A / ..... /

  b) En la UD secundaria:

     CF / ..... /

  En la lista bibliográfica se consignan consecutivamente la UD principal y las UD secundarias.

e) Idiomas

ORIGINAL TITLE (TITRE ORIGINAL, TITULO ORIGINAL) da el título en el idioma original

TITRE FRANÇAIS (TITULO ESPAÑOL) da el título en francés o en español cuando existen ejemplares en estos idiomas o cuando el documento es bilingüe o trilingüe.

f) Sinopsis

La sinopsis da, en una o varias frases, una idea de la forma y contenido de la unidad documental. Cada frase está formada por *descriptores* o /palabras clave/ unidos, de ser necesario, por otras palabras.

Los *descriptores* los eligen los encargados de formar los índices tomándolos de un vocabulario de términos normalizados. La(s) palabra(s) clave son términos complementarios escogidos a criterio de los encargados de formar los índices y que se proponen para su posible inclusión en el vocabulario, una vez analizada su frecuencia e idoneidad.

Tanto los *descriptores* como las palabras clave se escriben, entre sus respectivos símbolos, en singular, pero de ser necesario se añaden sufijos para consignar el plural u otras formas derivadas. En algunos casos, esto da lugar a una ortografía defectuosa (como, por ejemplo, tratándose de bibliografía en inglés, *COUNTRY*S, *HIDROLOGY*CAL.. No obstante, presenta la ventaja de reunir en el índice analítico las distintas formas de un mismo término.

INDICE DE AUTORES

En este índice se consignan todos los autores por orden alfabético, junto con el número de referencia de los documentos que dichos autores hayan preparado, editado o compilado. Sólo en muy pocos casos han obligado las limitaciones de espacio a abreviar apellidos o a unir apellidos compuestos.

INDICE ANALITICO

1. Esta parte representa un índice detallado por materias del contenido de cada unidad documental descrito por las frases que componen la sinopsis.

2. Se ha procedido al asiento de todos los descriptores y palabras clave contenidas en la sinopsis, excepto unos cuantos descriptores de tipo formal como *DOCUMENTO DE TRABAJO* *PROYECTO DE INFORME*, etc., que sólo se emplean en las investigaciones hechas recurriendo directamente a la memoria de la calculadora, y que haría que el índice impreso se extendiera innecesariamente.

3. Los términos empleados para asientos aparecen inmediatamente a la derecha de la columna en blanco que se extiende verticalmente hacia el centro de la página. Cada anotación aparece "en contexto", es decir, precedida y seguida por las demás palabras o términos en la frase original de la sinopsis. Esto permite al usuario del índice elegir, entre los distintos asientos del mismo descriptor o palabra clave, los que respondan mejor a su búsqueda, en función del contexto, inclusive la indicación del país o región de que se trate, que aparece en una columna a la derecha. Cada asiento presenta también el número de referencia de la unidad documental de que se trate, que remite a la lista bibliográfica.

4. Cuando un *descriptor* o *palabra clave* se compone de varias palabras se han añadido en el índice analítico reenvíos a la segunda (tercera, etc.) palabra. Tales asientos aparecen aislados, sin contexto. El lecto debe consultar la primera palabra en la secuencia alfabética para para encontrar las referencias completas.

5. Se observará que, en la mayoría de los asientos, sólo figura parte de la frase original de la sinopsis; a veces, las palabras aparecen truncadas al principio o al final de una línea. Esto se debe a la limitación impuesta por la longitud de la línea impresa. Además, cuando un *descriptor* o /palabra clave/ empleado para un asiento aparece cerca del principio de la frase original de la sinopsis, la parte de la línea que queda a su izquierda es el final de dicha frase (el final se indica por el símbolo .=). Se procede de esta manera para que cada línea contenga el máximo de información posible.

MODO DE OBTENER LOS DOCUMENTOS RESEÑADOS

1. Las publicaciones y documentos se dividen en tres clases principales (P = Publicaciones, M = Documentos principales, W = Documentos de trabajo), dividiéndose cada una de ellas en subclases (véase la lista de abreviaturas). El símbolo que designa la clase aparece inmediatamente después del número de entrada y del año de publicación en la lista bibliográfica.

2. Las solicitudes de publicaciones específicas (símbolos PP, PS, PM o PI) y documentos principales (símbolos MO, MR, MI) deben dirigirse a la Sección de Distribución y Ventas de la Dirección de Publicaciones. Aparte de los documentos que llevan la indicación NOT REL. (no autorizada su distribución general), tal documentación puede servir de almacén a los precios de catálogo o contra pago de un canon de manipulación.

3. Las solicitudes de documentos de trabajo específicos (símbolos WM, WS, WI) deben dirigirse al Centro de Documentación. (Algunos de estos documentos pueden estar sujetos a limitaciones de distribución). Como normalmente no se mantienen existencias de estos documentos, los pedidos se atenderán reproduciento los textos en microfilms o fotocopias (véanse las tarifas más abajo). Se ruega indicar el sistema de reproducción que se prefiere. A las solicitudes de publicaciones o documentos principales de los que ya no haya existencias también se atenderá en la forma antes dicha.

4. A fin de facilitar la tramitación, todas las solicitudes deben indicar, además del autor y del título, el NUMERO DE ENTRADA (por ejemplo: Acc. N° 12345).

SOLICITUDES DE INFORMACION DOCUMENTAL

5. Las solicitudes de información documental sobre TEMAS específicos deben dirigirse al Centro de Documentación. Tales solicitudes deberán:

a) presentar la mayor precisión posible (v.g., indicando regiones o países, plantas, animales, enfermedades o productos determinados);

b) indicar si sólo se piden datos bibliográficos o también los documentos mismos;

c) en el caso de que se pidan documentos, indicar la modalidad de reproducción de éstos.
